

10/026,466
01USFP707-R.M.

9. (Amended) The driving circuit according to claim 1, wherein said first current mirror circuit further comprises:

- a ground terminal which is connected to a ground;
- a first circuit provided between said reference current input terminal and said ground terminal, to determine said plurality of output currents;
- a common ground line which extends from said ground terminal;
- a plurality of output terminals;
- a plurality of second circuits provided between said common ground line and said plurality of output terminals, to output a part of said plurality of output currents determined by said first circuit through said plurality of output terminals; and
- a third circuit provided at a next stage of said plurality of second circuits as said final stage of said first current mirror circuit, to output said output current determined by said first circuit.
